**Rosemarie Boyle, CSN
School Nurse**

Office of the School Nurse

Current Date: _____

Dear Parents,

This is to inform you that there is a case of streptococcal sore throat in your child's class. If your child shows any signs of illness, we suggest rest at home and a call to your doctor. The symptoms most commonly found in the above disease, are sore throat, vomiting, headache, fever, listlessness, and enlarged glands.

If your child is diagnosed with streptococcus please inform the nurse of the diagnosis. Please keep them home until they have been on an antibiotic for twenty-four hours.

Please feel free to contact me should you have any further questions. Thank you for your continued cooperation.

Sincerely,

Rosemarie Boyle, CSN
